

# readme

The quarto files in this folder are the website pages.

After edits, you can check on the website appearance by knitting `index.qmd` or *building* the project (Cmd-Shift-B). For best results, open `website.Rproj` so that you work in the correct project.

## Website Appearance and Navbar

- Set in `_quarto.yml`.
- If you make a new page, look under `navbar:` in `_quarto.yml` and add your page.

## Structure (May '23)

- data documents, e.g. spreadsheet of members, in `./resources`
- webpages: `index`, `Our People`, `Industry Partners`, `Events`, `Work With Us`.
